## Senior Project Manager

---

Dee Why, NSW 2099 ♦ email: [pm@eugenedoma.com](mailto:pm@eugenedoma.com)

Multi-talented project manager who delivers successfully complex high-tech projects on time and on budget. With many years of experience both on vendor-side and client-side of information technology projects as well as engineering projects, I know the business aspects of many industries from both parties' perspective. I have worked as an electrical and instrumentation engineer on construction and industrial sites. I capped off my extensive experience with software development by returning to academia, completing a PhD which encompasses the areas of linguistics, mathematical logic, model based software engineering and business services. In addition to teaching a post-graduate course. Over the years I have designed, installed and managed contractors to build data centres, communications infrastructure and disaster recovery facilities.

I have been a business analyst for numerous clients in finance, insurance, retail and transportation. Many clients have asked me to stay on as the project manager due to my comprehensive understanding of their business imperatives and processes.

---

### Blue Chip Client Experience

---

Experienced in a broad range of industries both as a contractor and as a team member. In many cases I worked for multiple clients concurrently or on multiple projects for a single client. Notable clients are:

- |                                |                                   |
|--------------------------------|-----------------------------------|
| ■ Aristocrat                   | ■ NIB                             |
| ■ Australian Computer Society  | ■ NSW Dept of Minerals and Energy |

| ■ Menzies Cargo                | ■ Virgin Mobile                   |
| ■ Mitsubishi Electric          | ■ Winterthur Group                |
| ■ MLC Superannuation           | ■ Woolworths                      |

---

### Education, Certifications & Memberships

---

- BE (Hons), MACM, MIEEE, PhD (University of Sydney 2016)
- Conversant with IEEE SWEBOK, iiBA BABOK and PRINCE2
- IBM Certified Solutions Expert DB2 UDB
- Oracle Certified Professional Database Administrator
- Hewlett Packard Star Certified Technical Professional
- Certified Internal QA Auditor, Australian Quality Council

---

## Examples of Projects Completed

---

### **Woolworths** Acacia Ridge High Bay storage refurbishment

- Coordinate multiple vendors and in-house teams.
- Delivered on October long-weekend as scheduled.
- Achieved delivery under-budget.

*By comparison, a prior comparable project in Sydney was completed 18 months late and at double the planned budget.*

### **NSW Roads and Traffic Authority** Heavy vehicle driver licensing scheme

- Coordinated efforts across seven Australian jurisdictions.
- Drafted preliminary federal and state / territory legislation.
- Managed contractors and IT resources across seven state agencies and police services.

### **Vales Point Power Station** Instrumentation, cabling and switchyard contracts administration

- Inspected works completed by contractors.
- Approved works orders to average value of \$1m per month.
- Redesigned control systems as required by works in progress.
- Negotiated with contractors to resolve as-built issues.

### **Wagga Wagga Regional Centre** Installation of SCADA system

- Managed delivery and installation of SCADA system.
- Organised training classes for operators.

### **NSW Department of Transport** Student Travel Subsidy Scheme

- Collected and document requirements from stakeholders.
- Designed information systems to provide administration functions.
- Managed hiring of contractors, procurement of equipment.
- Managed development phase of project.

### **Secure Data Group** Data Centre

- Designed new data centre using relocated equipment.
- Managed building trades, resolved architectural issues.
- Managed relocation of A/C and installation of electrical services.
- Planned and managed staged relocation of servers, communications and networking.

Designed, planned and managed construction and commissioning of data centres, servers and communications infrastructure for:

- Aristocrat
- Cochlear
- ING Bank
- Liberty Life
- TNT
- Vigil Tech

Planned and managed ministerial document management systems for:

- NSW Department of Transport
- NSW Department of Minerals and Energy
